3. Poppit Beads

Poppit beads are a useful laboratory modelling unit. They can represent disaccharide and polysaccharide molecules in demonstrating carbohydrate metabolism and can also be used to represent genetic code as well as whole chromosomes, or as amino acids, dipeptides, polypeptides and proteins in protein metabolism.

Code	Description	Pack	Price
EDU1250	Green	200	**£3.59**
BB1192	Mixed	250	**£29.44**

4. Murashige and Skoog Basal Medium

Powder, suitable for plant cell culture. Medium contains macronutrients that include high levels of nitrate and organic additives such as agar, sugars, vitamins and growth regulators for the cloning of cauliflower.
