1. SATZ Biological Microscope

The Biological Microscope is robust, designed specifically for use in school experiments. It is 3/4 sized and is well suited for introducing students to the basic principles of microscopy. The microscope is of coated metal construction, with coarse and fine focusing, 360° rotating head and 4X, 10X and 40X objectives. Supplied with rechargeable batteries, power adaptor and dust cover.

Key features:

- 45° inclined monocular head for comfortable viewing while seated, 360° rotation
- Widefield eyepiece 10X/18mm
- Revolving triple nosepiece with positive click-stops
- Achromatic objectives - 4X/0.1, 10X/0.25 and 40X/0.65
- Separate coarse and fine focusing
- 93mm x 93mm stage with spring stage clips
- Special built-in 0.65NA condenser with variable disc diaphragm
- Built-in adjustable LED illumination
- AA rechargeable batteries (supplied) and power supply

Are you a tegestologist?

There's four scientists in our collector series of coasters featuring artwork from our four cover editions. Want to complete the set?

Simply get in touch with your local Territory Sales Manager with one of the following to:

- **Arrange a visit or call** with your local SLS representative
- **Share a quick review** of a piece of equipment from this catalogue
- **Send us a short video** of you using your favourite bit of our kit

Contact details can be found on the inside front cover. Please let your dedicated Territory Sales Manager know which coaster design you'd prefer and they'll do their best to accommodate.
