## 1. Motic 28 Series LED Microscopes

1 Motic 10 YEARS 2 YEARS

Motic's 28 series LED microscopes offer bright white illumination with no heat. By using a rechargeable battery pack, this microscope can also be used cordless. Whether you are working outdoors, in a room which lacks electrical outlets or you simply prefer a tangle-free work environment, our 28 series LED microscopes offer a wide range of possibilities. Also included is a coaxial focusing system with a minimum increment of 2µm which ensures a perfectly focused sample. You can choose between a monocular, binocular and even a trinocular version.

Features of the 28 series:

- 45° inclined monocular head with diopter adjustment, rotates 360°
- Widefield eyepieces 10X/18mm
- Reverse mounted, quadruple nosepiece with positive click-stops
- EA achromatic objectives: 4X/0.10, 10X/0.25 and 40X/0.65
- Coaxial coarse and fine focusing adjustment
- Upper-limit stop to prevent damage to slides and objectives
- Rack and pinion mounted 1.25NA Abbe condenser with iris diaphragm and filter holder
- Rechargeable LED illumination with intensity adjustment

Additional features:

- 2801 features a large 120 x 125mm stage with locked-on spring stage clips
- 2802 and 2820 models feature a large 133 x 136mm stage with low position coaxial controls

**10 year warranty on optical/mechanical parts, 2 year warranty on electrical parts.**
