1. Pond Weed, *Elodea crispa* Substitute, *Egeria densa*

Due to the invasive plant directive, we can no longer obtain *Elodea crispa* so will be substituting with *Egeria densa* as an alternative. Approx 10 strands per pack.

Code	Pack	Price
BB1500	Each	**£10.60**

2. *Scenedesmus quadricauda* (to make Algal Balls)

Scenedesmus quadricauda is a quick growing green algae ideal for pollution, eutrophication and photosynthesis investigations, such as the popular 'algae wrapped in jelly balls' experiment.

This product is non-returnable.

Code	Pack	Price
ALG0001	30mL	**£16.16**
ALG0020	100mL	**£40.07**

3. Algae Gro Concentrate

A sterile enrichment for both fresh water and sea water, producing an almost universal algal medium.

This product is non-returnable.

Code	Pack	Price
ALG0002	20mL	**£10.30**

4. Clear Nail Varnish

Clear nail varnish is the traditional method used to take an impression of leaves in order to measure stomata density. Simply paint onto the leaf using the included brush, wait briefly until it is dry then peel off and view under a microscope.

Code	Pack	Price
VAR1022	8mL	**£6.48**

5. Clinostat - Electric

Essential for studies on geotropism and phototropism on seedlings, cut shoots and small potted plants. The seedlings are pinned to the cork table which is rotated by an electric motor. The clinostat is supplied with a 70mm diameter cork lined/ faced disc with a fitting to take a specimen tube. The angle is adjustable by a thumb screw with a clear plastic cover. The clockwork motor rotates 5 revolutions per hour. Complete with 3 core cable. 220v, 50Hz. 300mm (H).

Code	Pack	Price
B244	Each	**£109.51**
