

1. ETI 8000 pH Meter with Electrode

The ETI 8000 pH meter features an easy to read, LCD display and is supplied with a general purpose combination glass electrode and a carrying case. The 8000 pH meter indicates pH over the range of 0 to 14pH with a resolution of 0.01pH and an accuracy of ± 0.05 pH. The pH readings are manually temperature compensated over the range of 0 to 60°C (default 25°C). The unit will power off automatically after ten minutes, maximising battery life. At the touch of a button, the instrument will automatically re-calibrate itself when used in conjunction with pH buffer solutions.

2. Hanna edge® Hybrid Multiparameter Series

This tablet style instrument can be used as a bench instrument, with the supplied bench stand/electrode holder; or as a portable instrument, or attached to the wall with the supplied wall bracket. The Edge® also features a wipe clean capacitive touch screen, can log up to 1000 readings and has a USB port for easy export of data (no software required) with all GLP data. The Edge can also be converted into a conductivity meter or dissolved oxygen meter, with the purchase of additional probes.

- pH range -2.00 to 16.00
- Reads pH, mV and temperature
- Choice of 7 calibration standards plus two custom buffers
- Auto ranging, or manual range selection
- Automatic temperature compensation
- GLP: data of the last calibration performed is stored in the sensor
- Reading stability feature
- Basic or advanced mode
- Built-in battery allows use away from mains connection
- Micro USB for PC connection and charging

Supplied with:

- pH/temperature probe (HI 11310)
- USB power lead, mini USB PC cable and power lead
- Calibration sachets
- Quality certificate and instruction manual
