

SUSTAINABILITY

SLS Select Education

At SLS Select Education, we are committed to operating in an environmentally responsible and socially ethical manner whilst contributing positively to economic growth. We strive to be progressively transparent about the impact of operations, supply chain, and product portfolio, and as such aim to publish a sustainability report on an annual basis.

We aim to be a force for accountability and progress in our sector, distinguishing ourselves as a conscientious business which embraces its moral responsibility to pursue improvement and do the best we can for the planet and its people. Basically, we don't just want to be seen doing the right thing but actually be doing it!

We aim to be proactive in reducing emissions across our value chain, be transparent about our environmental and social impact, whilst ensuring that we are responsible in the way that we market products to our customers.
