

1. Raw Milky Quartz Mineral Specimen Set

One of the most abundant minerals on Earth. The tightly packed framework of tetrahedral silica that makes up this mineral gives it a high Mohs hardness rating of 7, a lack of cleavage planes and a distinct euhedral crystal habit. Excellent for classroom mineral study and identification. A must-have mineral for any specimen collection. Milky quartz is useful during lessons on mineral hardness, luster, and fracture. Set of 12 1inch samples.

Code	Pack	Price
ROK1222	12	£25.16

2. Set of Metallic Ores

Set of 20 metallic ores supplied in laminated diecut box. Each sample is numbered and there is a corresponding list of names on the box lid.

Code	Pack	Price
ROK1196	20	£8.70
