1

1. Magnifier LED Lamp

The magnifying lamp offers a high quality 3 dioptre 100mm Ø magnifier lens, which is suitable for close up inspections. There are 18 LEDs in the lamp that simulate daylight, which ensures consistent lighting conditions regardless of the environment it is being used in. In addition to this, the magnifying lamp also offers a strong-arm joint for quick positioning or height adjustment.

- 1.75x magnification lens offering high quality magnification results
- Shadow free LED reduces strain on the eyes
- Economical LED light will never need to be replaced
- Flexible and strong arm joint allows for greater manoeuvrability and optimum positioning
- Supplied with a UK mains plug and 1.5m cable

Are you a tegestologist?

There's four scientists in our collector series of coasters featuring artwork from our four cover editions. Want to complete the set?

Simply get in touch with your local Territory Sales Manager with one of the following to:

- **Arrange a visit or call** with your local SLS representative
- **Share a quick review** of a piece of equipment from this catalogue
- **Send us a short video** of you using your favourite bit of our kit

Contact details can be found on the inside front cover. Please let your dedicated Territory Sales Manager know which coaster design you'd prefer and they'll do their best to accomodate.

Follow us on social media for more ways to collect the set:
