1. Scotsman® AC Series Cubed Ice Machines

Self-contained, undercounter ice makers which produce unique, thimble shaped cubes which are very hard and very pure. Supercubes are made by spraying the water upwards into a supercooled inverted mould. Inverting the mould ensures that any sediment or impurities in the water are removed by gravity, leaving only pure water which creates a crystal-clear cube with a slow melt rate.

- Agion® technology resists the growth of microbes and the development of unpleasant odours
- Clean alert advises with a blinking light when it's time to clean the air filter which is accessed from the front
- Requires a 13 amp single phase power supply and plumbing to a filtered water supply and waste
- Ice production 10kg every 24 hour period
- Bin capacity 3kg
- Dimensions: H x W x D, 640 x 380 x 380mm

Code	Pack	Price
ICE2020	Each	£1330.97

2 PORKKA
2 YEARS

2. Porkka Automated Ice Cube Machines

Produces hard, crystal clear ice cubes that are long lasting. The positive spray method uses the minimum of water and electrical power to produce round, clear hard ice cubes.

- Bodywork made from stainless steel grade AISI 304
- One piece moulded food safe ABS plastic storage bins
- Spray system for crystal clear, hygienic and long lasting ice cubes
- Fully automatic production system
- All models equipped with cleaning system
- All parts for cleaning are accessible without the use of tools
- Bin thermostat to control production when bin is full
