1

1. Travelling Microscope

Designed to give maximum accuracy.

Horizontal and vertical scales made of brass steel. The cast iron base is fitted with three levelling screws and a smooth, machined top which the metal carriage slides over. The Perspex stage is perfectly designed to allow objects to be placed and measured, and slides can be clamped in a horizontal or vertical position using a clamping screw.

- Achromatic lenses
- Slides travel 210mm horizontally and 160mm vertically
- Eyepiece: 10x, FL: 50mm
- Vernier reading 0.02 or 0.01mm
- Supplied in a polished wooden case

Code	Pack	Price
MIC8512	Each	£347.92
