

## 1. Scotsman® AC Series Cubed Ice Machines

Self-contained, undercounter ice makers which produce unique, thimble shaped cubes which are very hard and very pure. Supercubes are made by spraying the water upwards into a supercooled inverted mould. Inverting the mould ensures that any sediment or impurities in the water are removed by gravity, leaving only pure water which creates a crystal-clear cube which is very hard with a slow melt rate.

- Agion technology resists the growth of microbes and the development of unpleasant odours
- Clean alert advises with a blinking light when it's time to clean the air filter which is accessed from the front
- Requires a 13amp single phase power supply and plumbing to a filtered water supply and waste
- Ice production 10kg every 24 hour period
- Bin capacity 3kg
- Dimensions: H x W x D, 640 x 380 x 380mm

**Code**  
**ICE2020**

**Pack**  
**Each**

**Price**  
**£1354.25**
