2. Azlon® Bibbette® Pipette Controller

Offering great control and speed of operation, this pipette filler has an innovative PTFE and silicone rubber valve assembly which controls the vacuum created by simple squeezing of the unique rubber bulb. By moving the thumb lever, pipettes from 0.1mL up to 100mL can be easily and accurately filled and emptied. Blow out pipettes are catered for by the depression of a small thumb operated squeeze ball. A replaceable PTFE membrane filter ensures liquid is not accidentally drawn into the unit (2 supplied). The filter and pipette holding cone can be sterilised by autoclaving.
