- Clear safety goggles designed to be worn in a tough work environment
- Provides protection from extreme impact up to 270mph
- Perforated vents prevent mist build up allowing the goggles to be worn with dust masks and prescription eyewear
- Attributed with a supersoft polycarbonate frame
- Anti-scratch and anti-fog coating

Code	Pack	Price
SAF1100	Each	£3.98

## 4. UV Germicidal Eyewear Cabinet - Goggles Sanitiser

Up to 36 pairs of goggles or glasses can be placed into this UV sanitising cabinet. Once the eyewear is in, the door is then closed and locked and a 15 minute timer begins. During that 15 minutes a high power UV bulb turns on and UV light fills the box. The UV light kills any germs on the eyewear. UV lamp will not operate unless the doors are closed and latched eliminating the possibility for any UV exposure. There is an indicator light which informs the user that sterilisation is in process.

- Uses UV germicidal irradiation (UVC) with a high efficacy of disinfecting hard surfaces that are directly exposed to the light
- Will not be effective for products that are porous or have parts unexposed to light, as the UV radiation cannot penetrate them
- Can rest on a desk, lab bench, or be hung on a wall (mounting hardware included)
- Unit measures 26" x 10" x 29", and is approximately 54lbs
- Inside grid measures 3.5" x 3.5" x 8" deep

Code	Pack	Price
CAB1280	Each	£483.46
