1. 3B Senses Anatomy Set

Includes models of the ear, eye, nose and skin.

Ear: the model represents outer, middle and inner ear. The detailed model has removable eardrum with hammer, anvil and stirrup as well as 2 part labyrinth with cochlea and auditory/ balance nerve. Ear on base for easy display.

Eye: the anatomical model dissects into both halves of sclera with cornea and eye muscle attachments, both halves of the choroid with iris and retina, eye lens and vitreous humour.

Nose: the model illustrates the structure of the nose with the paranasal sinuses in the upper right half of a face in 1.5 fold enlargement.

Skin: the model is shown 80 times magnified, so even the smallest structures can be seen in detail. It can be taken apart easily due to magnetic connections, and represents the three most important sections of skin: the human scalp, the palm of a hand, and the back of a hand.

1 3 YEARS

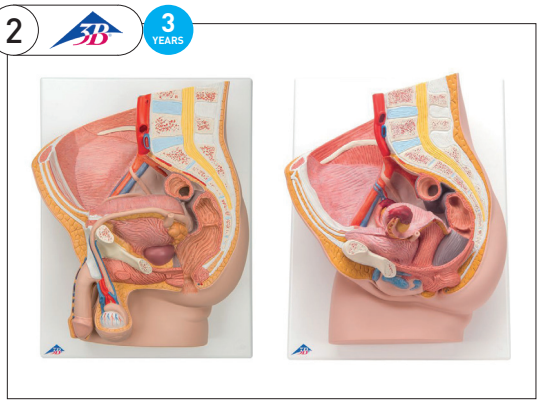

2. 3B Pelvis Anatomy Set

This female anatomy model shows one half of the female genital organs, with bladder and removable rectum. The female pelvis is delivered on a baseboard offering the possibility to be mounted to the wall for easy display.

The male pelvis anatomy model shows one half of male genital organs, with bladder at the normal position in the male pelvis. The rectum is removable for a more detailed study of the male pelvic anatomy. This anatomy model is delivered on a baseboard offering the possibility to be mounted to the wall.
