

1. SAMCO Test Tubes, Soda Glass

SAMCO soda glass test tubes are suitable for general mixing and simple laboratory work, and will withstand moderate warming (e.g. in a water bath). They should not be placed directly into naked flames.

2. SAMCO Test Tubes, Neutral Borosilicate

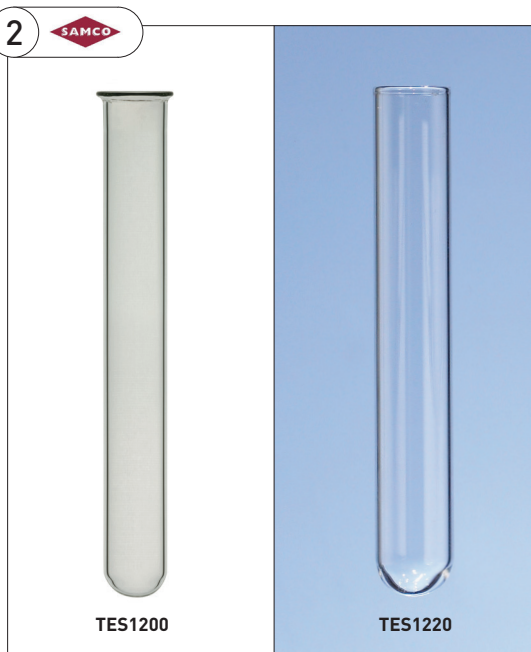

SAMCO neutral glass test tubes will withstand moderate temperature change, they should not be taken from cold and placed directly into the hottest part of the flame without preheating. They have good chemical resistance and are suitable for use with samples which are susceptible to pH change. Made from SAMCO 50 neutral borosilicate glass.
