Data Harvest Wireless Smart Sensors

DATA HARVEST

A new wireless smart range of science sensors that also function as data loggers in their own right using Bluetooth or USB connectivity. Mix & match existing SmartQ sensors and data loggers with our new Bluetooth sensors! The Smart Wireless sensors build on the design of our legendary intelligent SmartQ sensors adding Bluetooth wireless connectivity allowing users to connect to tablets and mobile phones using the new EasySense2 software.

Temperature Sensor

This general purpose wireless temperature sensor can accurately measure the temperature of air, water, soil and weak acidic solutions, making it indispensable in all science departments.

Code	Ranges	Pack	Now
LOG1100	–40 to 125°C, –40 to 275°F	Each	£74.95

pH Sensor Pack

Combines the pH adaptor and general pH electrode. This pH sensor has both a pre-set and user calibration range, it also has a mV range. The electrode is a general purpose plastic bodied glass non-refillable electrode.

Code	Ranges	Pack	Now
LOG1102	0 - 14pH (user/preset calibration), ±1000mV	Each	£98.95

Voltage & Current Sensor

A combined voltage and current sensor, which can be used to measure both electric current and the potential difference in low voltage AC or DC circuits. Measures the difference in potential voltage between two points, or the current flowing in a circuit.

Code	Ranges	Pack	Now
LOG1108	±20V, ±1A	Each	£124.95

Fast Response Temperature Sensor

This temperature sensor is extremely responsive as it features an exposed thermistor bead. It is ideal for determining changes in skin temperature, measuring air temperature in tight spaces or when some flexibility is required.

Code	Ranges	Pack	Now
LOG3014	–40 to 125°C, –40 to 275°F	Each	£74.95

Magnetic Field Sensor

Explore the nature and strength of magnetic fields of solenoids and permanent magnets with this sensor. Accurately measures the magnitude and direction of a magnetic field along three axes lying at right angles (X, Y & Z).

Code	Ranges	Pack	Now
LOG3016	±130mT, ±5mT	Each	£94.95

Absolute Gas Pressure Sensor

Absolute gas pressure sensor (one port) that measures the total pressure on a system. When the single port is left open the sensor will measure atmospheric pressure.

Code	Range	Pack	Now
LOG3020	400kPa absolute	Each	£99.95

Differential Gas Pressure Sensor

Differential gas pressure sensor (two ports) that measures the difference in pressure between the two ports. If one port is left open the measurement will be relative to atmospheric value.

Code	Range	Pack	Now
LOG3022	25kPa	Each	£99.95

Sound Level Sensor

This sensor accurately measures sound pressure level in decibels (dB) or examining the frequency content of sound in waveform (mV). The A filter used in the dBA range measures mid-range frequencies to approximate the normal human ear in the range and intensity that it "hears" sounds. The C filter (dBC range) suits low and high frequency sound levels.

Code	Ranges	Pack	Now
LOG3028	dBA, dBC, mV	Each	£109.95

Thermocouple Sensor

The wide temperature range of this sensor enables it to be used in a variety of experiments e.g. melting points and flame profiles. The sensing part is a replaceable K-type thermocouple, the junction of which is housed at the end of a stainless steel sheath.

Code	Range	Pack	Now
LOG3032	–200 to 1000°C	Each	£124.95

Light & Colour Sensor

This sensor can be used to measure not only the level of light in the visible spectrum but also the primary colours of that light and the UV portion of the electromagnetic spectrum. The sensor also has a built-in white LED that can be used as a light source, especially useful in experiments on reflectivity.

Code	Ranges	Pack	Now
LOG3026	Ambient light lux, fast ambient light lux, colour (RGB & LED), UV (UV index, nominal UV)	Each	£84.95
