Clifton Range®

Part of Nickel-Electro Ltd, is a British manufacturer, specialising in the design and manufacture of temperature control equipment. The company have a philosophy of manufacturing everything on-site, in order to control lead time, quality and cost.

1 Clifton NE2D Digital Bath, Unstirred

Clifton NE2D digital water baths provides a stable temperature environment with digital PID temperature control for precision. Controls feature auto alarm settings, illuminated on/off switch, heater and over temperature indications. 3 year warranty.

- Sensitivity ±0.2°C
- Uniformity ±0.1°C
- Temperature range ambient +5 to 99°C
- Digital PID control with LED temperature display
- Over temperature alarm with heater cut off +4°C above set point
- Touch pad controls with easy wipe surfaces
- Painted body and controls features antibacterial protection
- Drain outlet on 22 and 28 litre, option of accessory gated tap
- Lid recommended above 60°C

3 Hanna HALO™ Plastic Bluetooth pH electrode

HALO™ is the world's first professional pH probe with Bluetooth® (4.0) smart technology. With a 10m range, HALO can be used outside or in the Lab, in sealed fume cupboards and can be monitored from a distance. It can be used in two ways, with the free HANNA Lab app or with Edge Blu pH meter. HANNA Lab app allows the user to calibrate and to have full GLP data, a continuous pH log and fluid graphing facility using the iPad pinch and zoom technology. Connects quickly by selecting the relevant probe from a drop down list.

Features:
- pH range/accuracy -2.000 to 16.000/ +/-0.005pH
- mV range +/-800mV
- Temperature range -20.0 to 120.0°C
- Calibrate with up to 5 points with seven standard buffers
- Auto temperature compensation
- Quick simple connection to iPad/Edge Blu
- Glass pH electrode for general purpose use
- GLP data logging
- Fluid dynamic graphing & alarm feature (with HANNA Lab app)

HALO used with HANNA Lab app. Is designed for use with iPad 3rd generation & iPad Mini with Bluetooth 4.0 and iOS 7.1 or later.

locktronics

Locktronics is a range of products manufactured in West Yorkshire that simplifies the process of learning and teaching electricity and electronics. The core range consists of more than 200 electronic components,

1

1 Fundamentals of Electricity Kit

This kit provides an introduction to the fundamentals of electricity. It is ideal for those who are completely new to the subject, and is suitable for use from ages 8 to 13. The kit is supplied with 30 pages of notes and worksheets. (In the UK suitable for KS1, KS2 & KS3 science units 2F, 4F, 6G).

Learning objectives/experiments:
- What is electricity?
- Simple electrical components
- The simplest circuit
- Conductors and insulators
- Switches
- Two way switches
- Series circuits
- Parallel circuits
- Buzzers
- Motors

2 Energy & The Environment Kit

This course provides an introduction to renewable energy generation and energy saving measures through intelligent building control. As such, it addresses the aims of a number of courses in science and technology. A comprehensive set of curriculum worksheets and supporting documentation deliver experiments to illuminate the issues raised.

Learning objectives:
- Advantages/disadvantages of renewable energy sources: photovoltaic, wind, wave, hydroelectric
- Solar cells and their operation
- Electricity generators
- Solar heating and energy storage
- Voltage regulation
- Efficiency of a filament lamp and LED lamp
- Insulation and double glazing
- Energy efficient building design using microcontrollers
