

Your Plastic

Used uncontaminated or sterilised plastic lab consumables go into your RecycleLab bin.

New Consumables

The pellets are used to manufacture new products & we're working towards manufacturing laboratory consumables which can be used by you!

What Happens to Your Plastic?

Collected

Your plastic recycling is collected and taken to RecycleLab's warehouse.

Sorted

The plastic consumables are sorted by plastic type at the RecycleLab warehouse and then shredded into flakes.

Processed

The plastic flakes are transported to a processor where they are melted and formed into pellets.
