

**NEW**

# CSL-Labset 1

Stock Code: CSL-Labset1

New from Cleaver Scientific is a complete low cost electrophoresis set ideal for practical classes to demonstrate the process of electrophoresis at schools, universities and research institutes.

The set contains everything required to cast, load and run two 7 x 10cm mini DNA gels. Four comb positions in each tray allow 32 samples to be loaded per gel and the 20 gel reagent kit included allows multiple experiments to be performed at no extra cost.

The 20 gel reagent kit includes enough reagents for 10 two gel experiments including Agarose, Buffer, DNA markers, Safe stain and Loading dye.

## Contents Include:

- NanoPAC-300 Mini Power Supply for running two Gel Tanks
- Two MSMINI10 Electrophoresis Chambers with two 7 x 10cm Trays
- Two Adjustable-Volume Pipettes, 2-20ul
- Eight MS7-8-1 8-Well Combs
- CSL-Education Pack

## Kit Contains

x 1
